

CasPis Earth

Consultancy

Organization Profile

Conservation and Sustainability Partners in
innovation and Science

The background features a large, stylized arrow pointing right, composed of overlapping dark teal and yellow shapes. In the bottom left, there is a dashed semi-circle and a series of connected lines forming a zig-zag pattern.

About CasPis

CasPis is comprised of creative and focused individuals with passion for the environment and a greater love for Conservation.

Through research, planning and brainstorming, our team is focused at providing our clients and stakeholders with the most practical environmental management solutions

With an experienced team offering passionate environmental solutions, our clients are guaranteed results way beyond their compliance agenda.

Mission | Vision

Mission

To champion sustainable industrialization solutions, through inclusive community partnerships and creative innovations

Vision

To achieve sustainable development in developing countries by 2030 and set the standard for sustainable industrialization solutions

Services Offered

Environmental Management

01

The CasPis Team offers top-notch and up to date Environmental Management solutions compliant with the ISO 14001 Environmental Management System and the statutory regulations by the Zambia Environmental Management Agency (including The Environmental Management Act of 2011). EMS include

1. Compliance and environmental sustainability solutions through models such as the PDCA and EMAS
2. Environmental and social impact assessment
3. Air quality control and monitoring
4. Project Monitoring and Evaluation
5. Company returns and related reports

Sanitary Engineering

02

1. Solid waste management
2. Hazardous waste disposal
3. Designing and execution of sustainable sanitary services
4. Water management and treatment
5. Drainage solutions
6. Off site sanitation solutions
7. Portable water supply

03

Eco-friendly engineering solutions

Eco-friendly engineering solutions in construction and maintenance services

Projects

0

Completed

The Kaligalinga Drainage Project- completed in 2019

02

On going

1. The CasPis 'safe to breath movement' in partnership with "ClearVu"
2. The CasPis study on the impacts of industrialisation in Solwezi:
3. The CasPis Solid waste Sensitization Program

03

Proposed

The CasPis 'iRecycle Project

What sets us apart

The speed of technological advances have exposed the need for rapid practical environmental remedial solutions. While other organisations are more focused on meeting compliance standards, our team provides solutions that go way beyond operational compliance and cost reduction.

We provide real value solutions that do not only focus on ensuring compliance but provide achievable, sustainable and realistic outcomes that both protect and improve operational results.

Our guarantees

1. Inclusive solutions that are endorsed by communities and workers

3. Environmental protection

5. Improvement of efficiency and reduction in operational costs

7. Profitability and innovation

2. Sustainable growth of organisations

4. Stakeholder engagement and support

6. Compliance to statutory obligations

Brief history about CasPis

CasPis Earth Consultancy is an organisation that has its origins traceable from the efforts by two students from the University of Zambia. In the months before the rainy season of 2019, Mr. Elias Chabinga, a fourth year student in Civil and Environmental Engineering projected the hazardous floods that frequently caused chaos in the neighbourhood of Kaligalinga township of Lusaka.

This led to Mr. Chabinga joining forces with other students namely, Emmanuel Bwalya, Mazanga Alufeyo and other partners to foresee the success of The Community and Students Partnership to Improve Sanitation (CASPIS).

Through stakeholder engagement and support from local leaders such as the Ward Councillor then, the program became a success and multiple water drain solutions were implemented.

Fast forward to date, 'CASPIS' was rebranded to 'CasPis', to cover a wider range of environmental and engineering solutions, as 'Conservation And Sustainability Partners in Innovation and Science'. This new approach was forged with the input of Mr. Morris Chanda who's vision of forming a 'sustainability-focused' Civil and Environmental Engineering Organisation played a key role.

The Team

Chief Planning Officer

Nancy Namutende

*Bachelors degree in Development Studies
Masters in Business Administration (MBA)*

Projects Manager

Emmanuel Bwalya

*BSc. Environmental Education
Environmental Educator*

Staff

Josphat T Kilembe

*BSc. Bachelor of Mineral Science in
Geology
Geologist*

Founder and CEO

Elias Chabinga

B.Eng Civil and Environmental Engineering

Staff

Patrick Mwale

*Bachelors of Science in Wildlife
Management
Farm Administrator, Ecologist*

Co-founder and CTO

Morris Chanda

*BSc. Ecology and management of
Natural Resource
GIS Technician, M&E, Web Developer*

Staff

Percy J Saili

*B.Eng. Engineering (Major:
Electronics and Telecoms.)*

**Finance Business
Planning Manager**

Mazanga Alufeyo

*Bachelor of Arts Degree with
Education (Mathematics and
History). Msc. In Actuarial Science.*

CasPis

Our organization consists of 11 employees and has a scope to create 150 direct jobs and 500 indirect jobs by 2030.
